

Internship/Short term training programme at Bioscience Research and Training Centre, Thiruvananthapuram

Bioscience Research and Training Centre, Thiruvananthapuram invites students undergoing Postgraduate/graduate courses in Life Sciences to undertake **Internship/Short term training programme** in the subject area of '**Basic Microbiology Techniques**'. The Program is aimed to introduce students to the basic techniques used in Microbiology and Molecular Biology. Programme involves lecture sessions and hands-on laboratory practices.

Candidates can apply using online application form available at KVASU website. Along with the application, candidates have to upload a half page write-up about the purpose of the internship, supported by a letter of recommendation from the Principal of the Institution where the student is undergoing the course authorizing that the candidate/institution will not use any of the data generated during the training period to make independent publications; and that the candidate will obey the rules and regulations of the institute.

The duration for the internship programme will be for two weeks with a fee of Rs 7,000/-. Fee once paid is non-refundable. The selected students will be intimated through e-mail along with the details for submission of the fees. The centre will not provide any support for the boarding/lodging. The students will have to make their own arrangement for stay during the programme. As there are limited number of seats, the selection will be provided by first come first serve basis.

The applications can be made through the website as Google form
